

Green hat outline is for Standard 56x65mm Pi4 hat design and is what we are currently using for the mainboard.

RED hat outline of 74x74mm is the maximum design size that we can use without redesigning the case.  
NOTE the directions that the board can expand

Photo Inset of current mainboard for clarification:

Can use full RED outline.  
JST Ph2 connectors can be through hole type for tighter spacing. Prefer to keep these in order on the sides if possible.

74mm
