

Move all this left. Relocating SW1 to below.

Can be re-organized as needed but please keep SW2 (kill switch) at the top edge.

Really want J1 here if possible

This 40-pin connector is a female connector
Connects directly to Raspberry Pi4 pins.

Will J2 & J4 have any clearance issues with components
in front of them? Also identify in the screen print which one
is for the 3V3 LED and which one is for 5V LED

Rotated logo 180 degrees

Added the SW1 here and INSET from the
edge of the board.
